Professor Joshua Lederberg
Department of Genetics
Stanford University School of Medicine
Stanford, California

Dear Dr. Lederberg:

I was so pleased to see you in Palo Alto, and I look forward to return. In the meantime, I shall look for your articles in the Washington Post.

Your suggestion that Haldane's biological prophecies be collected in one volume is most exciting, and I wonder if you would be interested in editing such a book. If so, we would be prepared to assist you in every way possible, so that your only task would be to select and arrange the articles and to write an introduction. The book might include Daedalus, the 1947 Princeton article on "Human Evolution: Past and Future," the Ciba Symposium article, etc.; but I'm sure you have some pretty definite ideas as to what should be included.

In any case, it would be a pleasure to hear from you.

With best wishes,

Sincerely yours,

Michael Aronson
